SIGMA

Company profile and key products
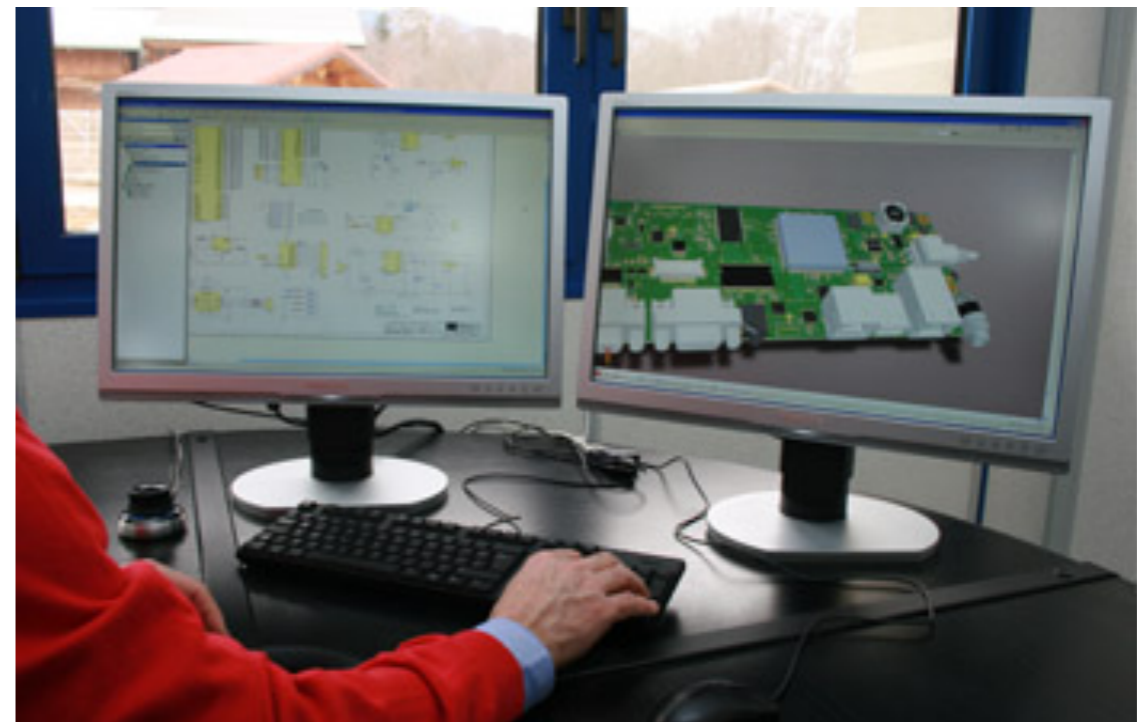

About SIGMA

- Sigma Group of companies has more than 20 years experience in the security market

- R&D and manufacturing of equipment and software for integrated security systems

- Supply of products for major and very important objects

Research & Development of hardware equipment

- Developed more than 200 devices for security systems

- Great experience in the development of detectors, alarm and fire control panels, access control equipment, CCTV

Software development

- Development of application software for security systems

- Developed by three generations of Physical Security Information Management (PSIM) software

- Software development for Windows, Linux, and for the protected OS: MSVS, Astra Linux, Elbrus

Manufacturing

- More than 5,000 sq.m. own production facilities in Moscow

- The advanced automatic production line of surface mount electronic components

- SMT Line productivity of more than 40,000 components per hour

Quality system

- Quality Management System ISO 9001:2015

- Automated functional testing equipment for mass production

- Own laboratory for environmental tests and EMC

Key clients

- Security forces: Ministry of Defence, the Federal Penitentiary Service, FSB, FSO

- Large corporate industrial structures: Gazprom, Rosneft, Lukoil, Tatneft, Surgutneftegaz, Rusal, Arcelor Mittal

- Commercial and residential buildings

Key products

- Integrated security system the INDIGIRKA

- Address security system the Rubicon

- Integrated security system the Rubezh

Integrated security complex INDIGIRKA

scope of application

- The equipment is designed for use on large, industrial, distributed, and special objects

- The range of equipment and capabilities of the system allow you to create high-performance, reliable and scalable security systems
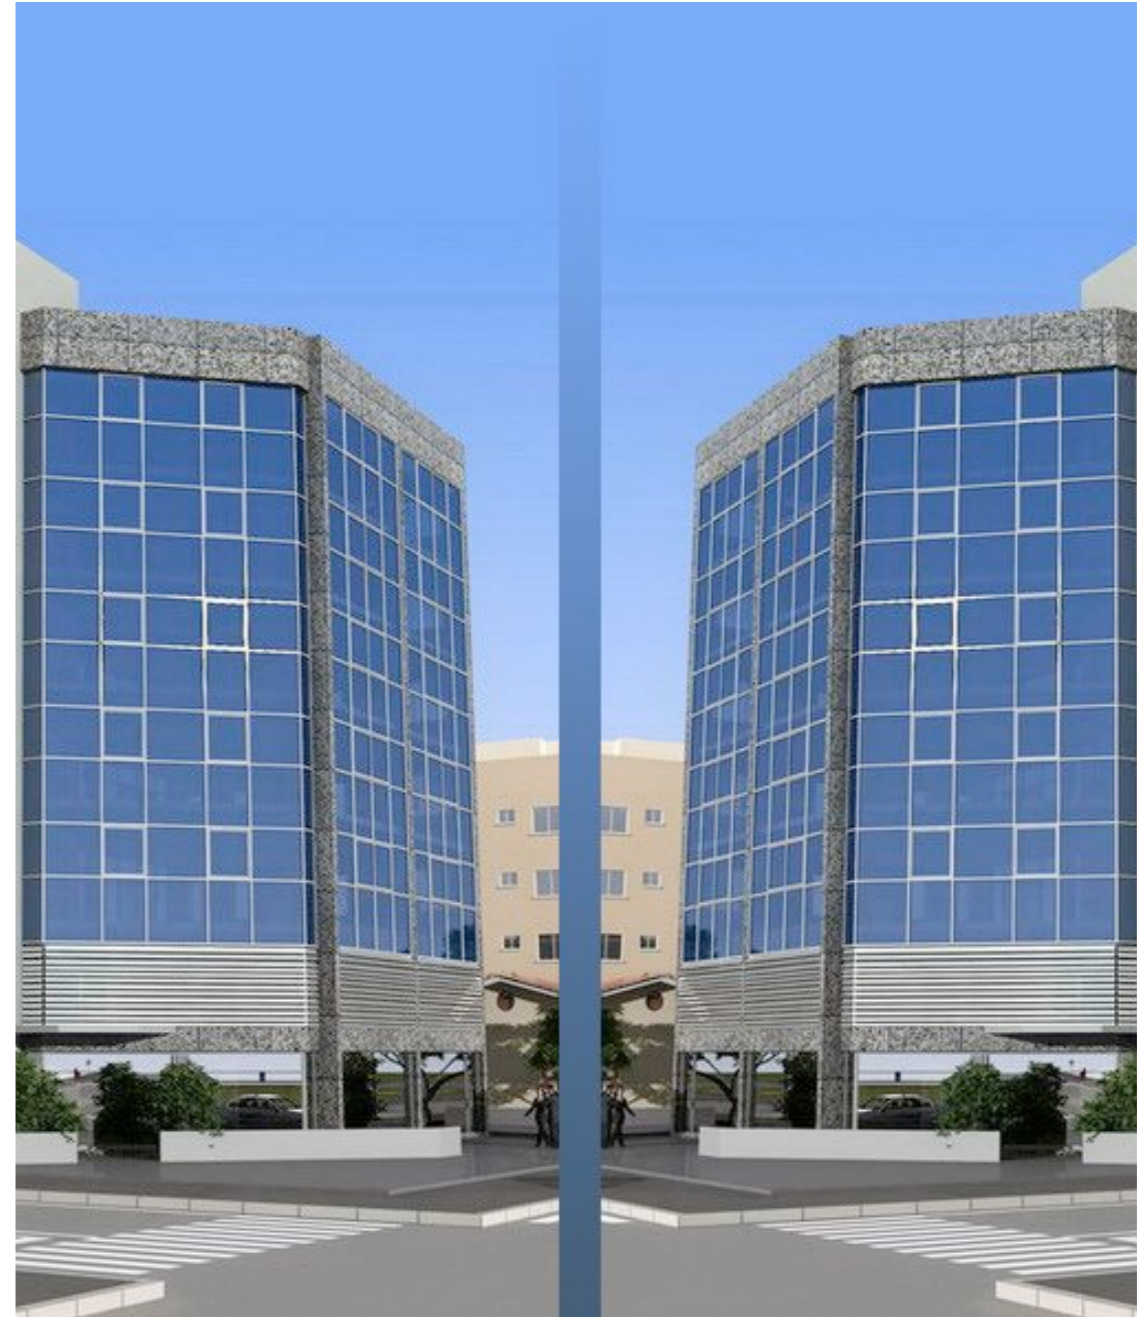

Address security system Rubicon

scope of application

- Rubicon is intended for use in commercial and residential real estate objects

- Full range of addressable sensors and modules for fire alarm systems and access control

- Low cost solution

Integrated security system Rubezh

scope of application

- Military and special objects

- The entire product range of the system is for the supply of the Russian Defense Ministry

- The system is included in the list of authorized products for use in the Federal Penitentiary Service, FSO, FSB

- The use of secure operating systems for servers and top-level workstations

- Supply of products with military acceptance
